

To: Miller MightEvac and MightyLite Self-Retracting Lifeline End-Users

From: Honeywell Personal Protective Equipment

Date: March 19th, 2021

Subject: IMMEDIATE MANDATORY INSPECTION NOTICE

Please read, review, and follow the instructions in this notice carefully.

WARNING! All recipients of this mandatory inspection use notice must read, understand, and follow all instructions. Failure to do so may result in serious injury or death.

At Honeywell, our mission is to continue to provide innovative personal protective equipment that helps our customers maintain workforce safety. You have been identified as a customer that has purchased certain Miller MightEvac and MightyLite Self-Retracting Lifelines (SRLs) products that were returned for repair work by Honeywell between **September 1, 2019 and March 5, 2021** (the "Repair Period"). Honeywell has identified a potential issue with reworked brake components that may cause the products to not operate to specification.

While there have been no reported incidents related to this issue, out of an abundance of caution, we are sending this notice to provide guidance on certain testing that must be completed immediately and prior to use in order to ensure proper operation of these SRLs.

If you are a direct customer of Honeywell, please ensure that you or your employees are taking the below steps. If you are a distributor customer of Honeywell, please alert your customers to this issue immediately so that they can take the proper steps to address the issue.

Note: This notice only affects the models listed in Table 1 that were repaired during the Repair Period. Models outside of this date range, including new units, are not affected by this notice. Do not return any SRL units that fall outside of these parameters or that are operating properly as per the product manual.

For any MightEvac and MightyLite SRLs that fall within the specified parameters of this notice, the user must take the following steps immediately:

Step 1. Look for model number on the product label and the date of manufacture (see Figure 1 below).

Step 2. If the model number on the label is on the list on Table 1 AND was repaired during the Repair Period, then move to Step 3.

Step 3. Refer to the Operation and Inspection section of the user manual and perform the pre-use inspection of the braking mechanism. The braking mechanism can be tested by grasping the webbing or cable ABOVE the load indicator and applying a sharp steady pull downward which will engage the brakes. There should be no slippage of the webbing or cable while the brakes are engaged. Once tension is released, the brakes will disengage and the unit will return to the retractable mode. User Manual: <https://prod-edam.honeywell.com/content/dam/honeywell-edam/sps/his/en-us/products/fall-protection/documents/HIS-MF-i267-self-retracting-lifelines-user-manual.pdf>

Step 4. In the event of a malfunction or if you have any questions please contact Honeywell Repair Center at 1-800-873-5242 (option 5) or email hsprepairs@honeywell.com. If you are a distributor, please inform your end users that purchased these units and instruct them to contact Honeywell Repair center.
