

Product Advisory

Products:

Select 3M™ DBI-SALA® Delta™ and 3M™ Protecta® Harnesses

Impacted Dates:

May – November 2021

This is not a recall. 3M™ DBI-SALA® Delta™ and 3M™ Protecta® Harnesses remain safe to use.

As part of 3M Fall Protection’s ongoing commitment to delivering high quality safety equipment, we are notifying our customers of the following information related to specific 3M™ DBI-SALA® Delta™ and 3M™ Protecta® Harnesses. During internal testing, it was discovered that some models of these harnesses did not consistently meet the required performance of ANSI Z359.11-14 clause 4.3.4 headfirst dorsal dynamic drop at the required 3600 lbs. (16 kN) impact force. The forces during this internal dynamic drop testing were greater than 3200 lbs. (14.2 kN). Personal energy absorbing devices are designed so that the user does not experience impact forces greater than 1800 lbs. (8 kN). There have been no reports of injuries, accidents, or complaints associated with this issue. Since detecting this issue, 3M Fall Protection has modified the design to ensure that all harnesses produced after December 1st, 2021 will consistently meet the stated ANSI certification as identified on the label.

End Users

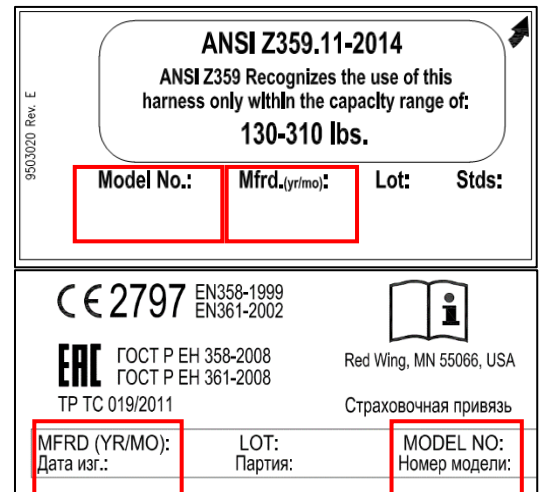

If this notice of non-compliance to the ANSI Z359.11 requirement is of concern to you, please inspect your product label (see images to right) to confirm that it is one of the affected part numbers listed in Appendices 1 & 2 and was manufactured in the affected time range: May-November 2021. Once you have confirmed the part number & affected date, please contact the 3M Fall Protection Customer Service Team for additional information about how to return your product to 3M. Returned product(s) must pass a pre-use inspection. If the product passes the inspection, we will remediate or replace your product free of charge. If it fails inspection, we will dispose of the product and contact you.
